DOCUMENTARIES & KEYNOTE SPEAKING:

On June 27th, 2015, Caleb was bodysurfing in South Africa when he survived a Great White shark attack, resulting in the loss of his right leg above the knee. Rather than letting the experience define him, Caleb turned it into a driving force for impact and storytelling.

Now an award-winning actor, documentary presenter, and keynote speaker with over a decade of experience, Caleb shares his journey of resilience, purpose, and transformation with audiences around the world. His talks—and his films—explore how we face fear, find meaning in adversity, and live with boldness and authenticity.

Through powerful storytelling and lived experience, Caleb invites others to reframe challenge as opportunity and live with greater intention and courage.

The following documentaries capture Caleb's incredible journey:
